

Coil Tubing Weight Indicator System

Wagner Instrumentations Coil Tubing Weight Indicator Systems are designed specifically for use on coil tubing units. The system is available in either a dual acting or single pointer application depending on the needs of your coil tubing unit. Single pointer systems are complete with 6" or 8 ½" gauge, bracket to mount gauge, hose assembly, disconnects set, load cell and recharge kit consisting of a hand pump and (1) qt. of instrument fluid. Dual acting systems include 8 ½" gauge, bracket to mount gauge, (2) hose assemblies, (2) disconnect sets, (2) load cells, and recharge kit consisting of a hand pump and (1) qt. of instrument fluid.

Features:

- Gauges are fluid filled to ensure proper lubrication and shock resistance
- Load cells are equipped with heavy duty diaphragm rubbers for long lasting durability
- Single pointer gauges available in 6" or 8 ½" versions
- Gauges calibrated a full 360 degrees using a ball bearing style movement to ensure accuracy to within .5 to 1 percent of full scale capacity
- Available in English or Metric divisions

Benefits:

- Rugged design ensures years of reliable, accurate measurements
- Each system custom built to suit your application

To order specify:

- Gauge size (single pointer gauge only)
- Capacity and ratio of coil tubing unit
- Single or dual acting system
- Length of hose
